

- playing. Listens to tracks together to make
- sure they are blending well.
- Adjusts volume of both tracks so that they are well leveled. Adds comments to particular places
  - along the tracks asking for thoughts/ feedback/special attention.

- Saves progress, though autosave ensures nothing is lost.
- Shares project back to bandmates. There is no need to add them again as they are already saved to the project.

and manipulate tempo based on previous recordings. Recorded vocal tracks use voice

ensures she will not lose progress.

- recognition to document lyrics sung. Records multiples takes until satisfied.
- Cuts and splices different tracks until all tracks are blended well. Edits lyrics that were logged via voice
- recognition. • Saves project.
